

SBTi targets – Zwanenberg Food Group Holding B.V.

Almelo, April 2026

Our Science-Based Climate Targets

Zwanenberg Food Group Holding B.V. has established science-based greenhouse gas emission reduction targets that are aligned with the objectives of the Paris Agreement. Zwanenberg Food Group's near-term targets have been validated by the Science Based Targets initiative (SBTi).

Reducing emissions in our own operations

Zwanenberg Food Group commits to reducing absolute Scope 1 and Scope 2 greenhouse gas emissions by 71,06% by 2032, compared to a 2022 base year, in line with a 1,5°C pathway.

Reducing emissions across our value chain

Zwanenberg Food Group commits to reducing absolute Scope 3 greenhouse gas emissions by 30,0% by 2032, compared to a 2024 base year, aligned with a 1,5°C pathway. In addition, Zwanenberg Food Group has set specific targets for emissions related to forests, land use and agriculture (FLAG), committing to an absolute reduction of 36,4% in Scope 3 FLAG emissions by 2032, compared to a 2024 base year. Zwanenberg Food Group also commits to no deforestation across its primary deforestation-linked commodities by 31 December 2025, aligned with a 2,0°C pathway.

These science-based targets form a key element of Zwanenberg Food Group's climate transition plan and provide a clear framework for reducing greenhouse gas emissions across its operations and value chain. Progress against these targets will be monitored and reported in accordance with the ESRS requirements.
